NSE Code: SUNLITE

Sub: Investor Presentation for HY2 FY 2024-25

Pursuant to terms of the Regulations 30 of the SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015, an Investor Presentation issued by the Company with respect to captioned subject is attached for your information and record.

Kindly take the above on record and oblige.

Thanking you.

Yours Sincerely,
For, Sunlite Recycling Industries Limited

Nitin Kumar Heda
Managing Director

- INDUSTRY OVERVIEW

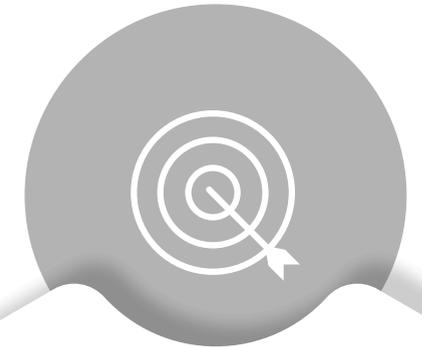

Established in 2012, Sunlite Recycling Industries specializes in manufacturing diverse copper products from recycled scrap at its state-of-the-art plant in Kheda, Gujarat.

The company specializes in processing copper scrap sourced globally—including from Saudi Arabia, UAE, USA, and India—and converting it into high-quality copper solutions.

Its product portfolio caters to diverse applications in domestic, industrial, automotive, power generation, transmission & distribution, and electronic sectors

Sunlite has established a strong footprint across 10+ Indian states & U.T.

BUSINESS OVERVIEW

Established Manufacturing Facility

ISO 9001:2015 for quality management systems assessed by International Certification & Inspection UK Ltd

Total of 20 machines to manufacture wide range of copper products

Safety procedures in the furnaces and maintained adequate insurance

Electricity is sourced from solar generation and clean natural gas for recycling of copper

Extensive & stringent Quality control mechanism for each manufacturing process

Product Portfolio

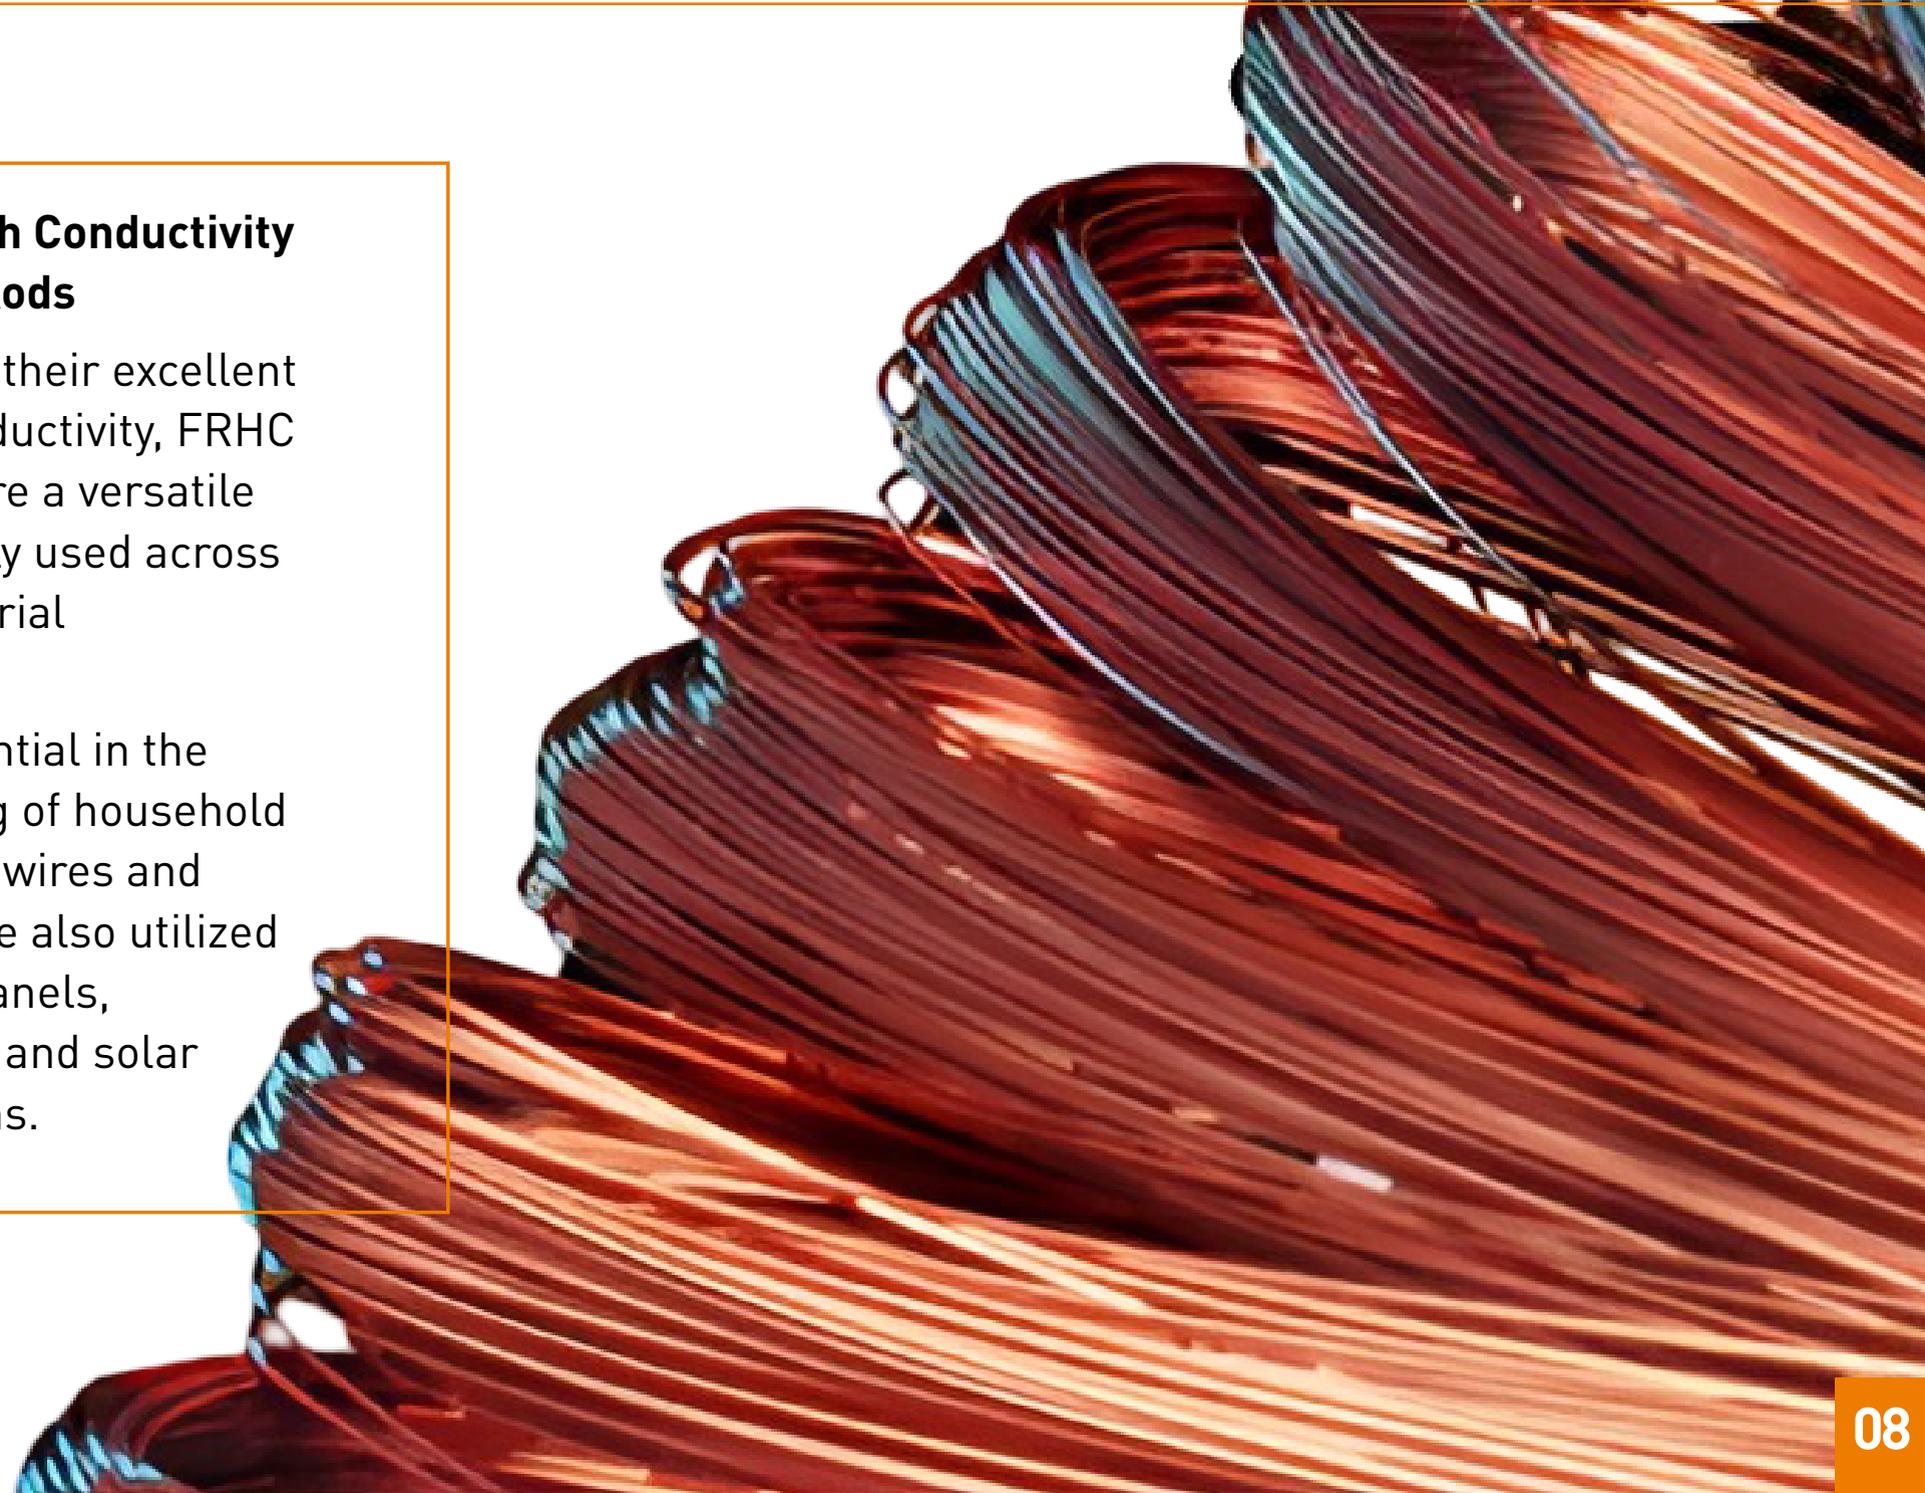

Copper Rods

Oxygen Free Copper Rods (OFC)

- OFC is a high-purity copper alloy that has been refined to remove all traces of oxygen and other impurities
- Also known for its excellent electrical conductivity, thermal conductivity, and low susceptibility to embrittlement

Fire-Refined High Conductivity (FRHC) Copper Rods

- Renowned for their excellent electrical conductivity, FRHC copper rods are a versatile material widely used across various industrial applications.
- They are essential in the manufacturing of household and industrial wires and cables, and are also utilized in electrical panels, transformers, and solar energy systems.

Product Portfolio

Copper Wires

Copper Earthing Wires

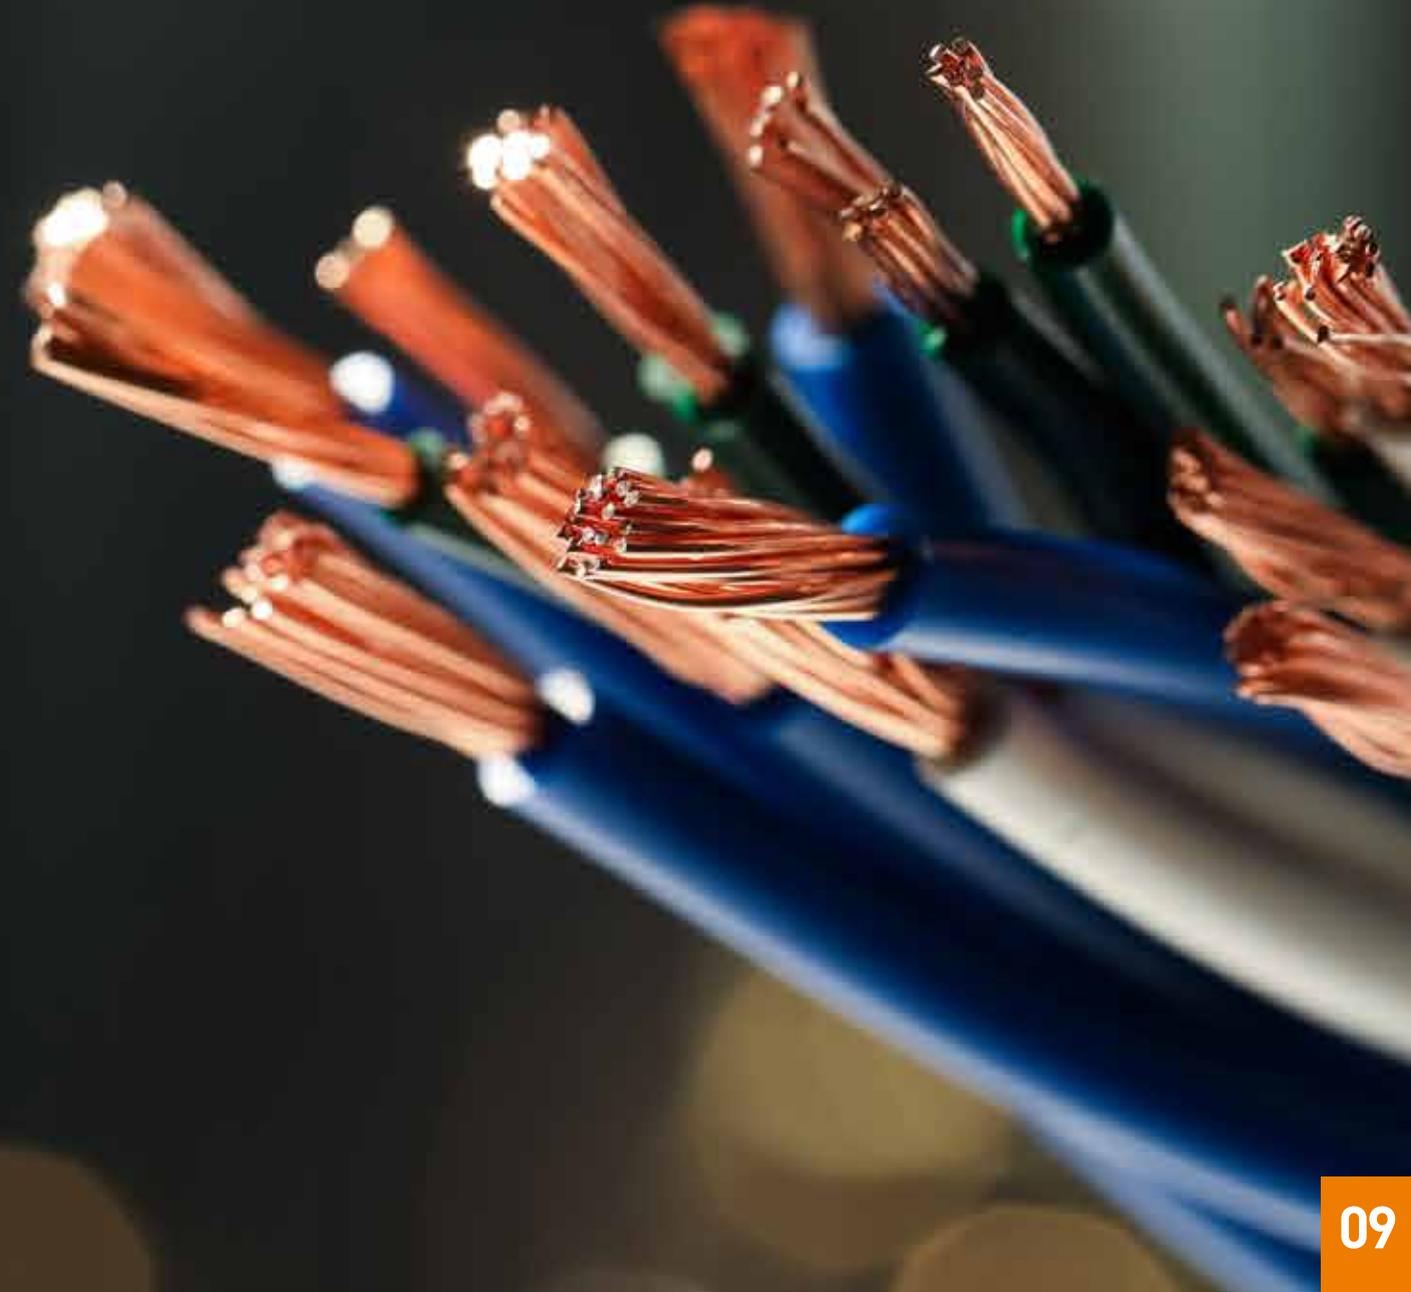

- The earthing or grounding system involves connecting the metallic components to an earth plate or earth electrode via an earth lead buried in moist soil

Copper Submersible Wires

- Essential for powering submersible pumps, especially where the wires are submerged in water

Copper conductors

- Used in electrical wiring in buildings, power transmission and distribution lines, electronic devices and telecommunications systems

Product Portfolio

Copper Strips

- Copper strips are thin, flat pieces of copper that come in various widths and thicknesses

- Copper strips are malleable, allowing for precise shaping and forming

- These strips are durable and can withstand mechanical stress

- The oxygen-free copper rod is fed into an extrusion machine to form copper strips

- Strips can be further processed to create different types of copper strips, such as flat strips, thin strips or customized profiles

Capacity Utilization

For FY:25, Total capacity utilization at 87.76% while capacity utilization for different categories is as follows:

Copper Rod

92.89%

Copper Wire

65.94%

Copper Strip

27.12%

Global Presence

Business Expansion Overview

ATC Manufacturing Line – Operational Progress

- Commenced production of Annealed Tinned Coated Copper (ATC) — a key step in forward integration and entry into value-added product segments.
- Currently operating at 60% capacity, producing ~480 MT/year out of an installed 800 MT capacity.
- Full capacity utilization expected within six months
- ATC is a critical input in solar and electrical sectors, known for enhanced conductivity, corrosion resistance, and long-term performance.

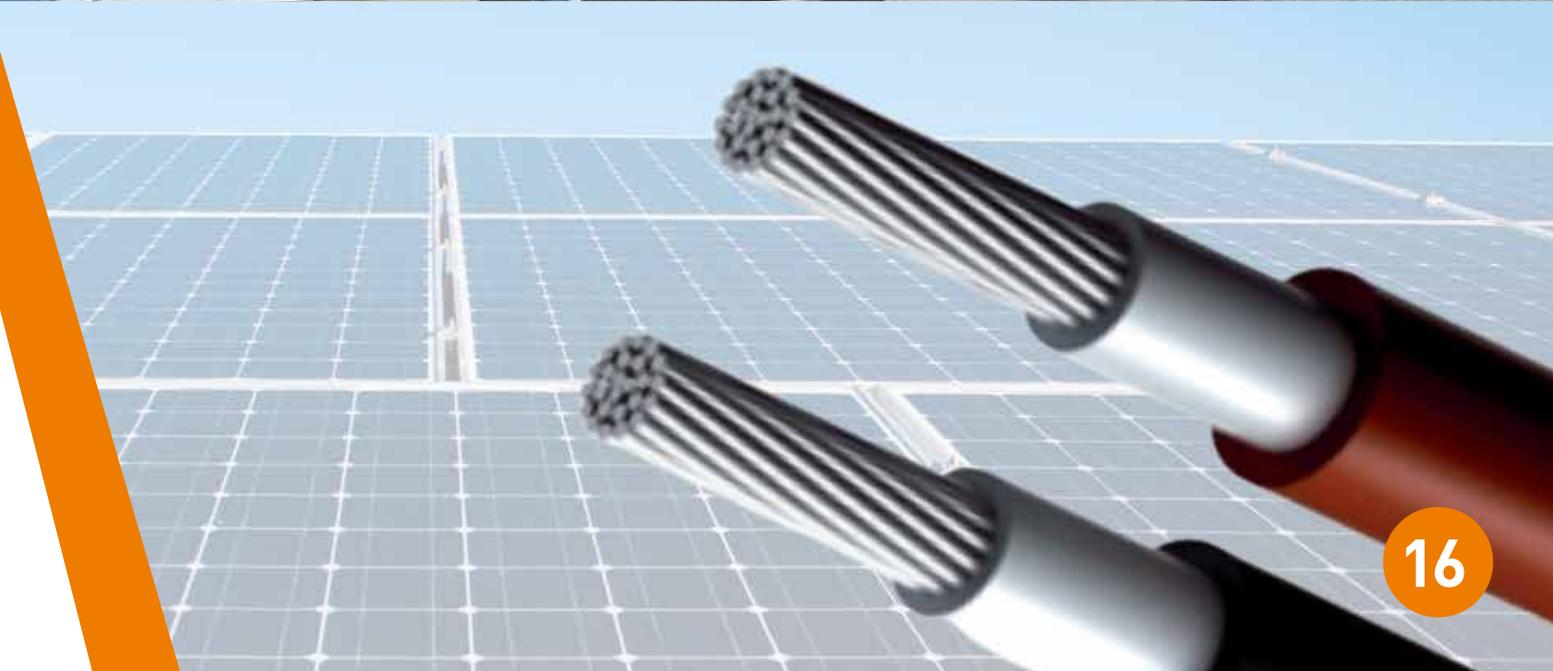

Business Expansion Overview

Infrastructure & Machinery Investment

To support our expansion strategy, we have:

- Completed construction of a new manufacturing facility
- Invested in advanced machinery, including:
 - i. Fine Wire Drawing Machine
 - ii. Copper Wire Bunching Machine (with tooling)
 - iii. Payoff Machine
 - iv. Factory Shed

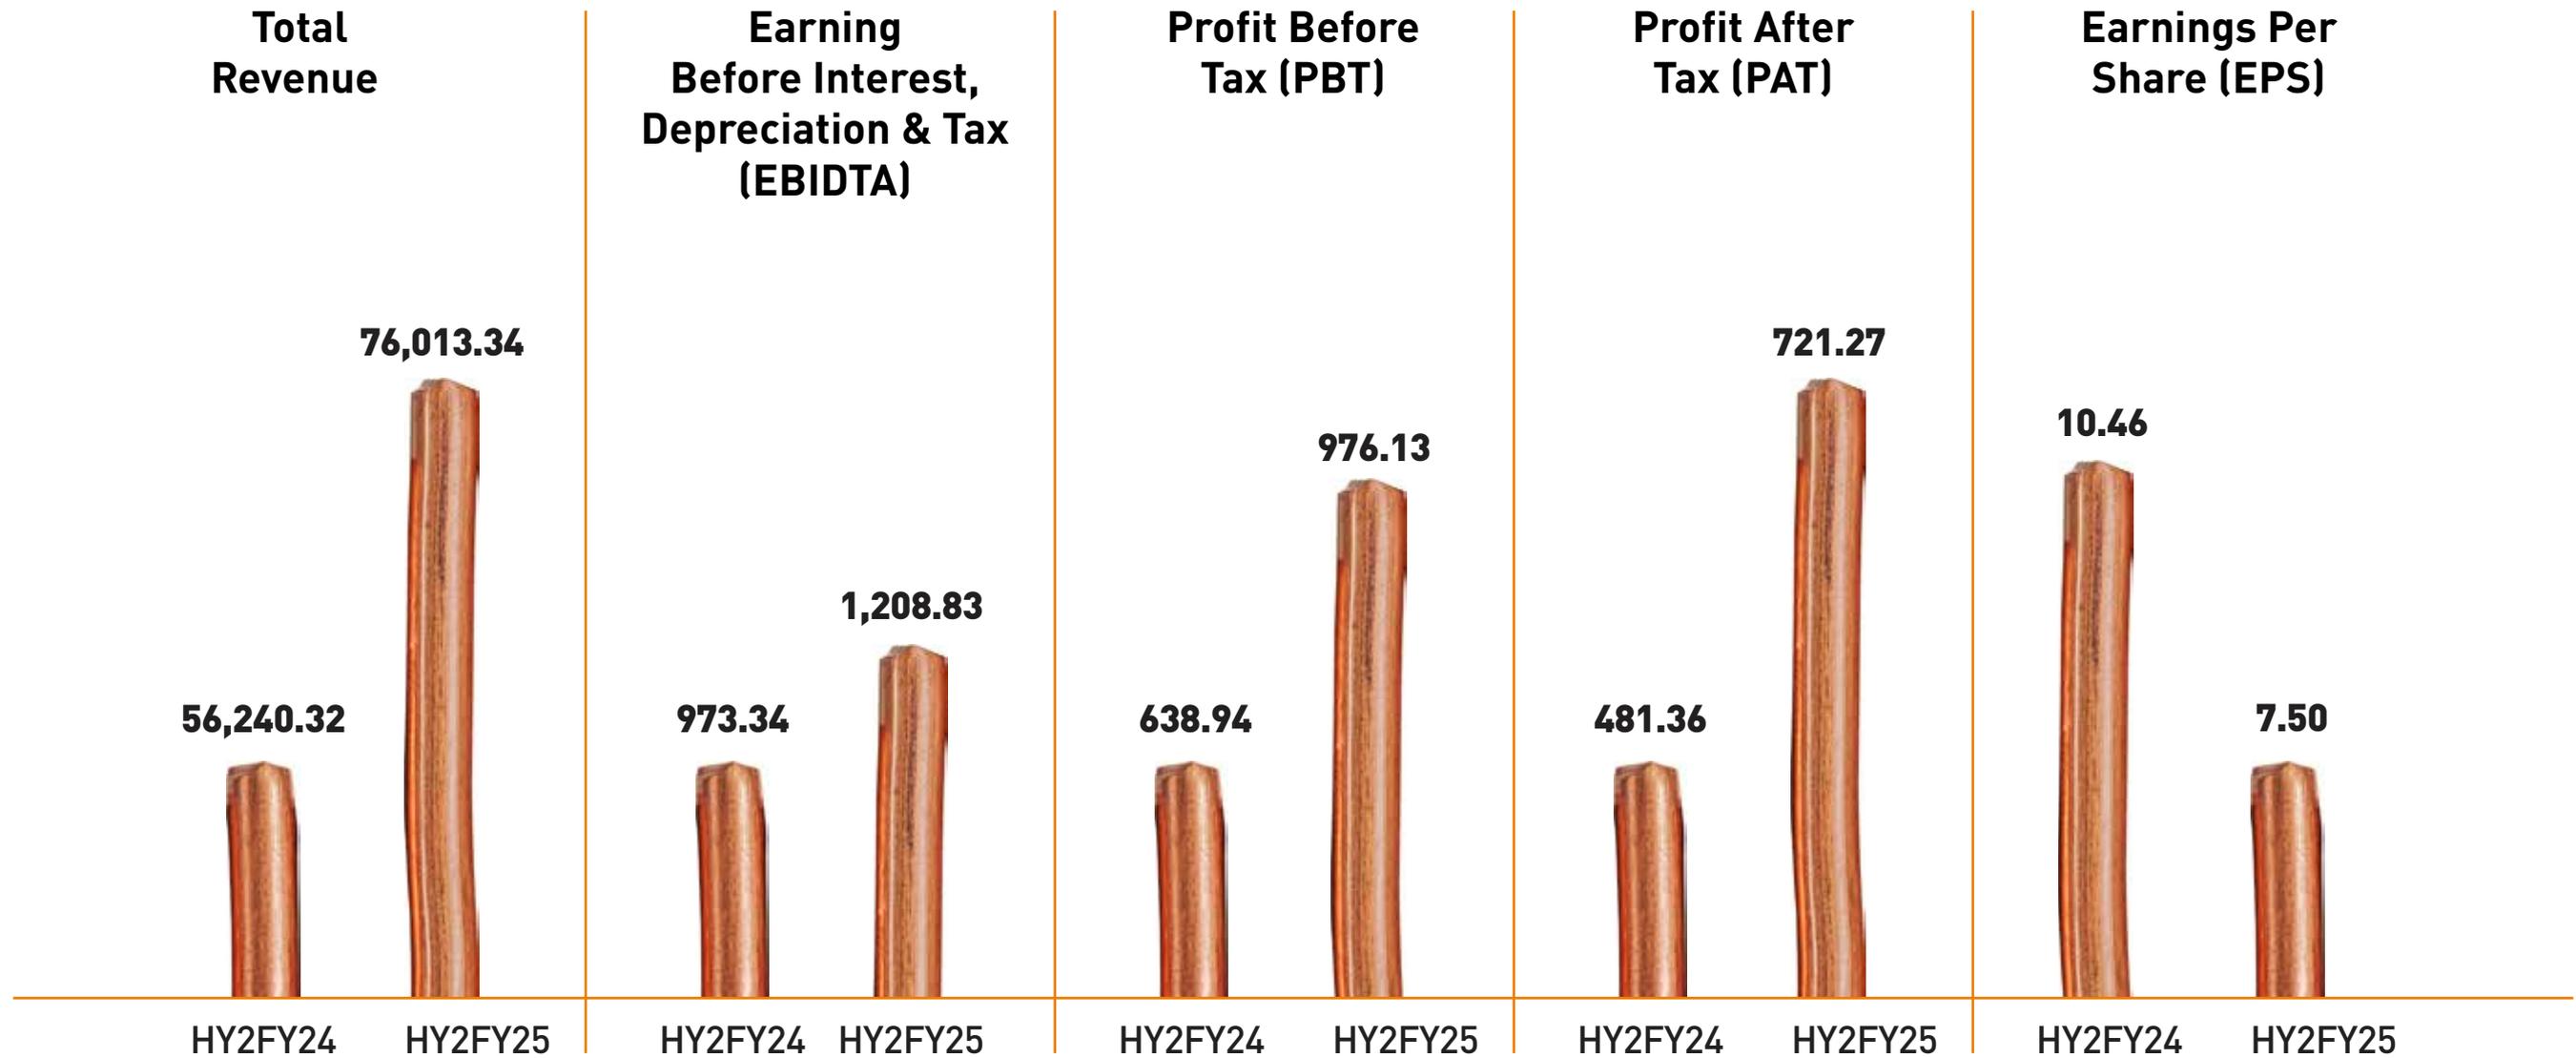

This strategic investment reflects our commitment to adopting cutting-edge technology and enhancing production efficiency to support sustained growth in the ATC segment.

Expand rooftop solar capacity by 80% in FY 2025–26 to strengthen renewable energy usage. ↗

Focus on revenue growth from the newly launched Copper Bus Bar production line starting this fiscal year. ↗

Double the capacity of the Annealed Tinned Copper unit to meet growing market demand. ↗

INDUSTRY OVERVIEW

The size of Indian copper industry (consumption of refined copper per annum) is around 6.6 lakh tonnes, which as percentage of world copper market is only three percent

In the current fiscal year (FY25), Indian copper demand is expected to grow by 7-10%, driven by increasing consumption in renewable energy and infrastructure development

In the domestic market, 40% of copper is consumed by the infrastructure and construction sector, with 11-13% each used in the automobile and consumer durable sectors. The Gol's focus on affordable housing, smart city projects, the Defence sector, and the expansion of EV infrastructure supports a positive outlook for domestic copper demand

The Gol's target to achieve 500 GW of renewable energy capacity by 2032 would entail significant capacity additions in the transmission network including for substations and electrical machineries in the coming decade, translating into a healthy domestic copper demand

In FY 2024, the transportation sector experienced a 34% increase in copper demand, largely due to a 41% year-on-year surge in EV sales
